Welcome to our Homeowners' Association (HOA) color library. If your community was originally painted, or has been repainted with Dunn-Edwards paint, you will find the approved color schemes in this section.

To find the color scheme for your association, enter your city and state, zip code, or the name of the association or sub-association. Your results will appear with the option to order color chips to view in your own home, or to download a PDF of the colors, complete with application notes, maps to the three closest stores, and a special offer with savings on your paint purchase.

Important!

Please verify your final color choices with your community's governing body before undertaking any exterior painting project.

Please note: codes on color provide important information:

- Alkali-Sensitive - may fade on highly alkaline masonry surfaces
- Interior Use Only - may fade due to low resistance to UV rays
- Low Hide - may require multiple coats

If you are not clear on use of the colors in your scheme, contact our Customer Service department (888) DE-PAINT(337-2468).
